FEEDING DIRECTIONS

Feed to Emu as a sole ration. Feed FCA Emu Breeder 3 to 4 weeks before onset of egg production and continue feeding Emu Breeder throughout the laying season. Following laying season, Emus should be fed FCA Emu Finisher. When feeding ratites, offer only enough feed as will be consumed in one day. If excess feed remains, reduce feed the following day. If all feed is consumed, increase feed for the following day. Forcing the birds to "clean up" the feed on a daily basis results in birds consuming a more balanced diet. Proper feed management can go a long way to increasing feed to bird nutrition and efficiency. Have plenty of clean drinking water available at all times.
